May / June 2012 News

1. **NEW:** E-book online: *Toxic Metals and Antidotes. The Chelation Therapy Handbook*.
<https://www.smashwords.com/books/view/156817>

2. **Metals in Whole Blood:** we added new blood profiles and updated reference ranges as shown below according to recommendations by environmental agencies. When submitting samples, please provide age and sex.

Element		children 3-14y	adults	male	female
Lead	35			90	70
Cadmium	0,3	1,0			
Mercury	0,8*	2,0*	(*Fish consumption 3x/mo or less)		

Values in mcg/l

For more information <http://www.microtraceminerals.com/en/diagnostic-humans/>

3. **Metals in Urine:** Stabilizers such as boric acid are not needed for metal testing.
4. **Comparison Reports:** by comparing previous with present reports, evaluation and assessment of data is less time consuming. If you want us to compare a patient's previous reports with a repeat test (Urine, blood, or hair etc), please provide us with sample numbers and date of testing.

Sample reports are attached or can be viewed under

<http://www.microtraceminerals.com/en/diagnostic-humans/>

5. **EDTA:** send us an abbreviated patient history with documentation of appropriate tests, before and after EDTA Therapy. We will evaluate and, if appropriate, include it in a medical publication, listing you as a contributor and source.
6. **Medical Week Baden-Baden 4.Nov.2012:** Dr. E.Blaurock-Busch lectures are scheduled. For more information: <http://www.metallausleitung.de/>
7. **Interested in lectures on Chelation Therapy and Laboratory Diagnostics? Contact us**
